(Research-)Data Protection

Keep personal info personal

General Data Protection Regulation (GDPR), ethical guidelines, federal or state data protection laws, written consent, principles of purpose or "broad consent", pseudonymisation or anonymisation: anyone who wants to handle personal research data in a responsible and legally compliant manner must observe many regulations.

WHY DATA PROTECTION?

- Compliance with ethical standards
- Strengthen confidence in research
- Putting long-term storage, use and/or transfer on a legally sound foundation
- Adhere to the specifications of funding bodies
