Data Management Plans

How to plan, structure and coordinate data.

What is a data management plan (DMP)?

A DMP structures the way you deal with your research data. It can serve as a checklist, as well as a basis for ongoing documentation: from survey to long-term storage or publication of your data. More and more research funding organizations, e. g. the EU or the German Federal Ministry of Education and Research (BMBF), demand the creation of a DMP.

What information does a DMP contain?

Get an overview here:

ADVANTAGES

- facilitates arrangements for data exchange in collaborations
- facilitates documentation in the case of reporting duties
- facilitates the reuse of your own data
- reduces the risk of data loss

The RDM team answers your questions regarding DMP:
